How to create your Cloudpermit account in 4 steps

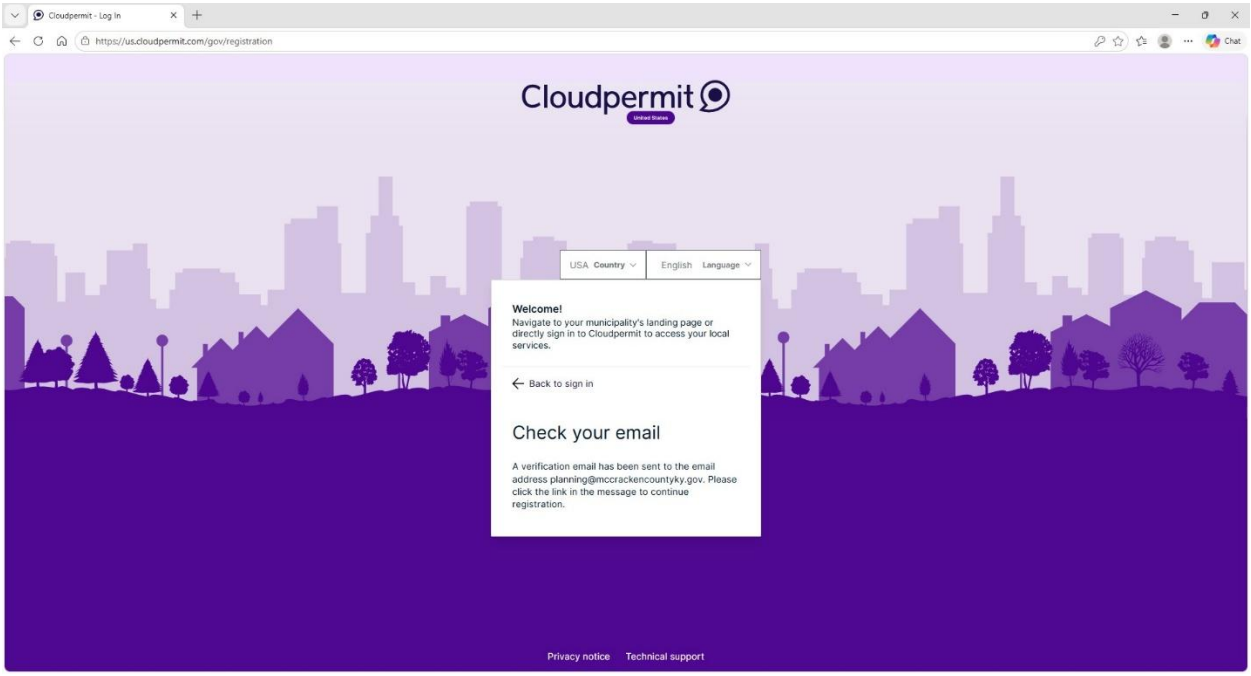

Step 1. Go to www.us.cloudpermit.com. In the welcome box, enter your email address and then click create account. If you have a Google account or Microsoft account, you can sign in using those instead of creating a Cloudpermit account.

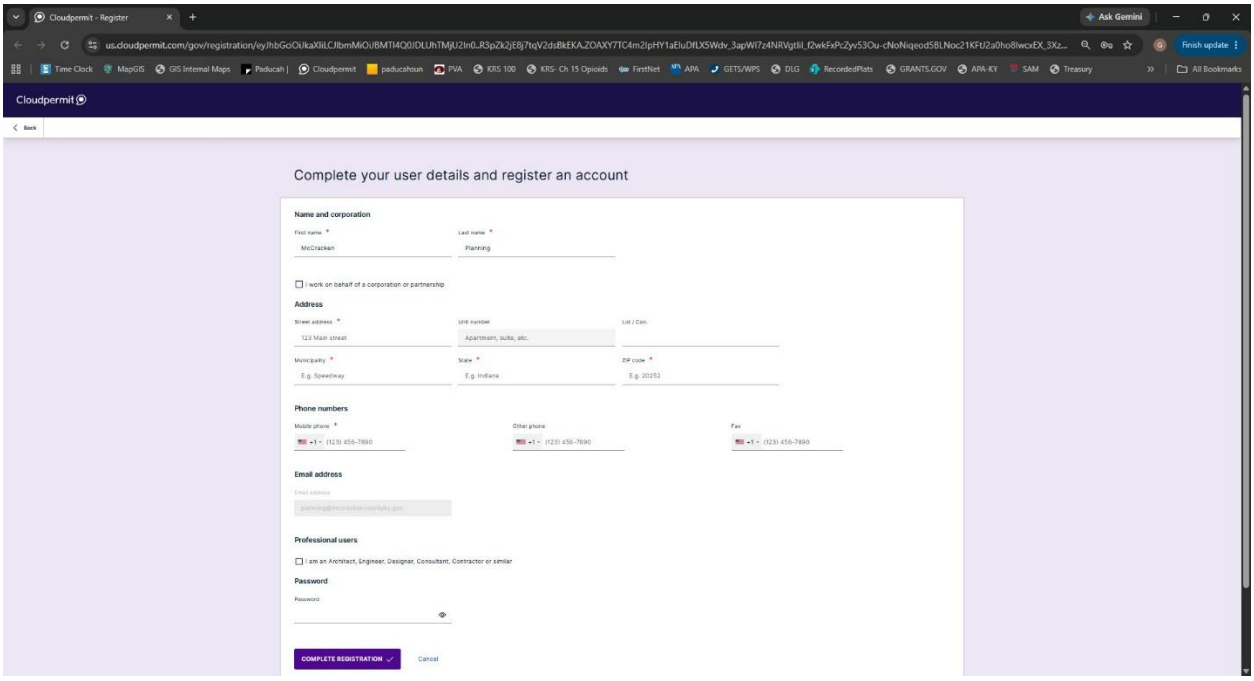

Step 2. Agree to the terms and click continue

Step 3: Check your email inbox for a verification email

Step 4: Complete your registration. All items with a red asterisk must be filled in. Once that is done, click "complete registration"

At this point, your registration is complete and you can now log in and submit your first application.
